LETTER OF TRANSMITTAL

Raleigh, North Carolina  
September 25, 1958

The Honorable Luther H. Hodges  
Governor of North Carolina  
Raleigh, North Carolina

Dear Governor Hodges:

I have the honor of transmitting the report for the Public Health Statistics Section of the Epidemiology Division, State Board of Health, covering the calendar year 1957.

Respectfully submitted,

J. W. R. Norton, M. D.  
State Health Director

791717

| 17. Accidental deaths by cause, color, and sex with crude rates per 100,000 estimated population: North Carolina occurrences, 1957.....   | 91  |
| 18. Resident infant deaths by cause and age: North Carolina, 1957.....  | 92  |
| 19. Resident infant and maternal deaths by color with rates: North Carolina and each county, 1957 and five-year average, 1953-1957.....   | 94  |
| 20. Resident live births, illegitimates, deaths, fetal deaths, infant deaths, and maternal deaths by color (Indians included in "nonwhite") with number occurring in hospitals: North Carolina, each county, urban and rural, 1957..... | 97  |
| 21. Resident live births, illegitimates, deaths, fetal deaths, infant deaths, and maternal deaths of Indians with number occurring in hospitals: North Carolina, each county, urban and rural, 1957.....                                | 107 |
| 22. Resident live births and deaths (excluding fetal deaths) by color and institution of occurrence: North Carolina and each county, 1957.....  | 108 |
| 23. Resident fetal deaths by color and sex with ratios per 1,000 live births: North Carolina and each county, 1957.....   | 111 |
| 24. Resident fetal deaths by color and sex with ratios per 1,000 live births: each incorporated place in North Carolina having a population of 10,000 or more, 1957.....  | 113 |
| 25. Resident fetal deaths by age of mother, color, and attendant with percentage distribution: North Carolina, 1957.....  | 114 |

## INTRODUCTION

The forty-second annual report, Part II, of the Public Health Statistics Section, formerly known as the Bureau of Vital Statistics, presents tabular information regarding North Carolina's population, births, deaths, and fetal deaths. The majority of the tabulations are by place of residence; selected tabulations, in whole or in part, are given by place of occurrence. Communicable disease morbidity data are shown in Part I of the annual report of the Section which is printed separately.

Reports have been published annually since 1914 with the exception of the years 1918 and 1919.

Certificates of births, deaths, and fetal deaths occurring in 1957 that were filed in 1957 and the first three months of 1958 are included in this report. It is estimated that vital events occurring in 1957 but reported after the first three months of 1958 will comprise less than two per cent of the total 1957 events. There are strong indications that registration in the state has been improving in recent years. The certificates are more complete and accurate and on the average have been filed more promptly.

Again in 1957 a tabulation was made of all birth and death certificates filed in 1957 by year of occurrence (see 1950 or 1951 annual report for explanation of interpretation). This was done in an effort to determine the per cent of certificates filed in time to be included in an annual report as compared with those filed too late to be included. The results of this study are shown in Table 8 of this report. This tabulation was prepared by county of residence in order to make available a correction factor that could be used by each county to more accurately calculate the natality and mortality rates.

### POPULATION

The population data in this report are estimated as of July 1, 1957, by the arithmetic method. This method assumes that each county or city had the same actual annual increase or decrease between 1956 and 1957 that it had on the average each year between 1940 and 1950.

### NATALITY

In 1957 there were 113,143 live births occurring to mothers who were residents of the state. All births were allocated to the place of residence of the mother regardless of the place of birth or the length of residence. Births occurring in hospitals, sanatoria, and all other institutions, were allocated to the place where the mother lived. Births occurring on military bases to military personnel were allocated according to the residence shown on the certificate. The crude birth rate was 25.6 births per 1,000 population. There were 75,343 white births and 37,800 nonwhite births. For the twelfth consecutive year, over 100,000 births were recorded.

This state defines a fetal death as a fetus showing no evidence of life after complete birth if the twentieth week of gestation has been reached. There were 2,075 resident fetal deaths reported, resulting in a ratio of 18.3 fetal deaths per 1,000 live births. If fetal deaths were considered as a single cause of death, they would rank fourth between cancer and influenza and pneumonia as a leading cause of death.

## PREMATURE BIRTHS

In order to achieve uniformity in the classification of premature infants in need of special care, and comparability of statistical data in hospitals and in studies of such infants, the definition of the American Academy of Pediatrics has been adopted; that is, a premature infant is an infant weighing 2500 grams ( $5\frac{1}{2}$  pounds) or less at birth regardless of the period of gestation.

In 1957 there were 9,866 resident premature live births reported among 113,143 live births. Birth weight was reported on all but 87 certificates filed in 1957. Consequently, at least 8.7 per cent of the new born babies weighed 2500 grams or less at birth. The number of premature infants by birth weight and color and by birth weight and age of mother are shown in the tables which follow:

## RESIDENT PREMATURE LIVE BIRTHS BY COLOR AND WEIGHT: NORTH CAROLINA, 1957

| Birth weight in grams | Total | White | Nonwhite |
|-----------------------|-------|-------|----------|
| Total                 | 9,866 | 5,378 | 4,488    |
| 500 or less.....      | 90    | 45    | 45       |
| 501-1000.....         | 514   | 285   | 229      |
| 1001-1500.....        | 885   | 471   | 414      |
| 1501-2000.....        | 1,918 | 1,071 | 847      |
| 2001-2500.....        | 6,459 | 3,506 | 2,953    |

RESIDENT PREMATURE LIVE BIRTHS BY WEIGHT AND AGE OF MOTHER:  
NORTH CAROLINA, 1957

| Age of mother      | Birth weight in grams |             |          |           |           |           |
|--------------------|-----------------------|-------------|----------|-----------|-----------|-----------|
|                    | Total                 | 500 or less | 501-1000 | 1001-1500 | 1501-2000 | 2001-2500 |
| Total              | 9,866                 | 90          | 514      | 885       | 1,918     | 6,459     |
| Under 15 years.... | 43                    | 1           | 2        | 8         | 8         | 24        |
| 15-19.....         | 2,158                 | 15          | 101      | 224       | 439       | 1,379     |
| 20-24.....         | 3,039                 | 23          | 168      | 253       | 568       | 2,027     |

| 30-34.....         | 1,437                 | 18          | 91       | 133       | 274       | 921       |
| 35-39.....         | 732                   | 7           | 41       | 65        | 150       | 469       |
| 40-44.....         | 200                   | .....       | 12       | 13        | 33        | 142       |
| 45-49.....         | 28                    | .....       | 1        | 2         | 6         | 19        |
| 50 and over.....   | 1                     | .....       | .....    | .....     | 1         | .....     |
| Not stated.....    | 1                     | .....       | .....    | .....     | .....     | 1         |

*MORTALITY*

There were 35,008 resident deaths recorded in 1957. The crude death rate was 7.9 deaths per 1,000 estimated population. Deaths were allocated to the place where the deceased resided unless the place of death item indicated that the deceased had been in the place of death for one year or more. In such cases they were allocated to the place of death, unless the death occurred in an institution. If this was the case, they were allocated to the place of residence, regardless of the length of stay in the institution.

All mortality statistics shown by cause in this report are classified according to the Sixth Decennial Revision of the International Lists of Diseases and Causes of Death. This is the ninth year that this revised statistical code has been applied to the causes of death.

In Table 14, regarding deaths from selected causes with rates, 1917-1957, it is necessary to take into consideration the effect of the revision of the International List and of the joint cause of death coding procedure in making comparisons between the trend in causes of death since 1949 with prior years. Comparability ratios for specific causes of death may be obtained upon request.

*INFANT AND MATERNAL MORTALITY*

There were 3,467 infant deaths and 81 maternal deaths reported. The resultant infant death rate per 1,000 live births was 30.6 while the maternal death rate was 7.2 per 10,000 live births.

In 1918 there was an all-time high rate of 101.8 infant deaths per 1,000 live births. The infant mortality rate was more than three times as high at that time as it was in 1957 while the maternal rate was nearly 15 times higher in 1918.

*HOSPITAL DATA*

All tables in this report which reflect events occurring in hospitals are based on the general and allied hospital definition of the North Carolina Medical Care Commission. A hospital is defined as a place where two or more non-related individuals reside 24 hours or more on the premises and receive medical care over and above any domiciliary care.

*RATES*

All rates shown in this report are crude rates unless otherwise specified. Such rates have not been adjusted for differences in the age, sex, color, rural or urban distribution of the population, or for under-registration or late reporting. Such factors should be kept in mind when comparing two different areas or time periods.

TABLE 1. -- ESTIMATED POPULATION BY COLOR: NORTH CAROLINA, EACH COUNTY, AND INCORPORATED PLACES HAVING A POPULATION OF 10,000 OR MORE, JULY 1, 1957

| Area           | Population |           |           | Area          | Population |         |          |
